

Technology Installation in Building 13 – Fall 2023 to Summer 2024

Updates from Alexis Arreola and Anthony Lim (October 23, 2023)

General Updates

- Progress of the classrooms in Building 13 is on track as planned.
- We have completed the installation of the wall monitors, HDMI wall plates and programmed the audio and video for the divisible rooms on the third floor.

Classroom Installations that will be completed by end of Fall 2023 semester

- We are confident that classrooms **13-330**-13-332, **13-331**-13-333 (Collapsible Rooms), **13-130**, and **13-337** will be ready by the end of this term.
- In bold are the classrooms that will have HyFlex equipment.
- Rooms 13-332 and 13-333 will only have access to HyFlex equipment when they are connected to 13-330 and 13-331 respectively with their collapsible walls down.

Classroom Installations that will be completed by end of Summer 2024

- As for the remaining half (**13-334**, **13-335**, **13-233**, and **13-234**), we anticipate completing them by the end of summer.
- These will all be HyFlex classrooms when the technology installation is complete.
