

Alternative Placement Study

Lessons learned from Long Beach City College

Dr. Chialin Hsieh, Dean of Planning, Research, and Institutional Effectiveness

Kim Lopez, Dean of Counseling

Cañada College

Brandon Lee, Director of Research and Evaluation

Sequoia Union High School District

Goals

- Assessment and placement are well-aligned with performance at Long Beach College?
- Students are more prepared for college than commonly believed

Preparation and Assessment

- Primary method of assessing level of preparation has been:
 - Performance on standardized assessments
- Conclusions from those assessments:
 - Students are simply unprepared for college
 - Underscored by first official contact with college

What is our typical response?

Can it really be the case that so many high school graduates are virtually unprepared for college work?

- State
 - About 80% of students who took placement test were placed into below college level math
 - About 75% of student who took placement test were placed into below college level English
- Cañada
 - Similar trends

Long Beach Study

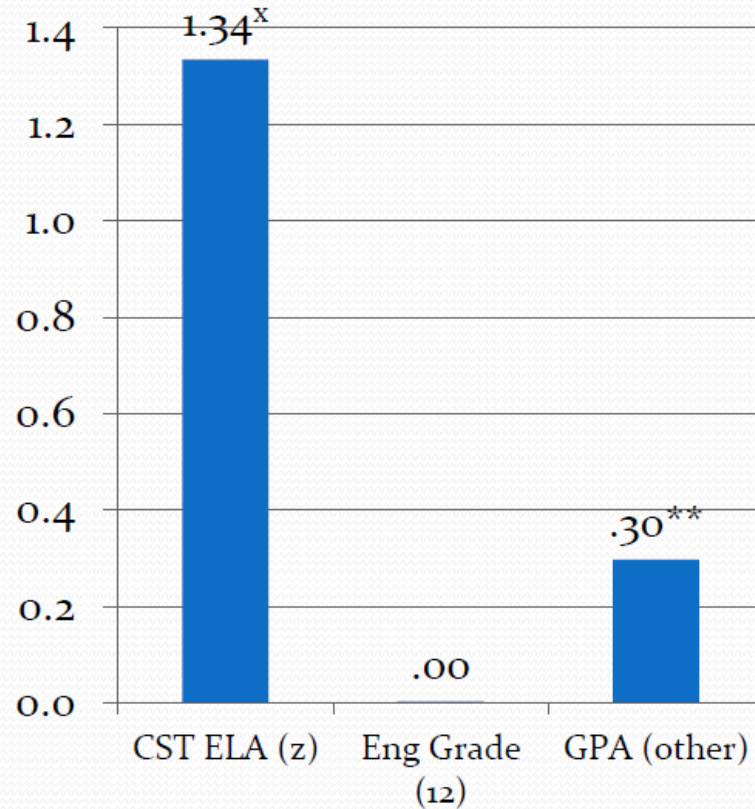

- Research Questions:
 1. What predicts how students assess and place into our developmental (below college) courses?
 2. What predicts how students perform (likelihood of successful completion) in those courses?
 3. How well are placement and performance aligned?

Placement vs. Performance

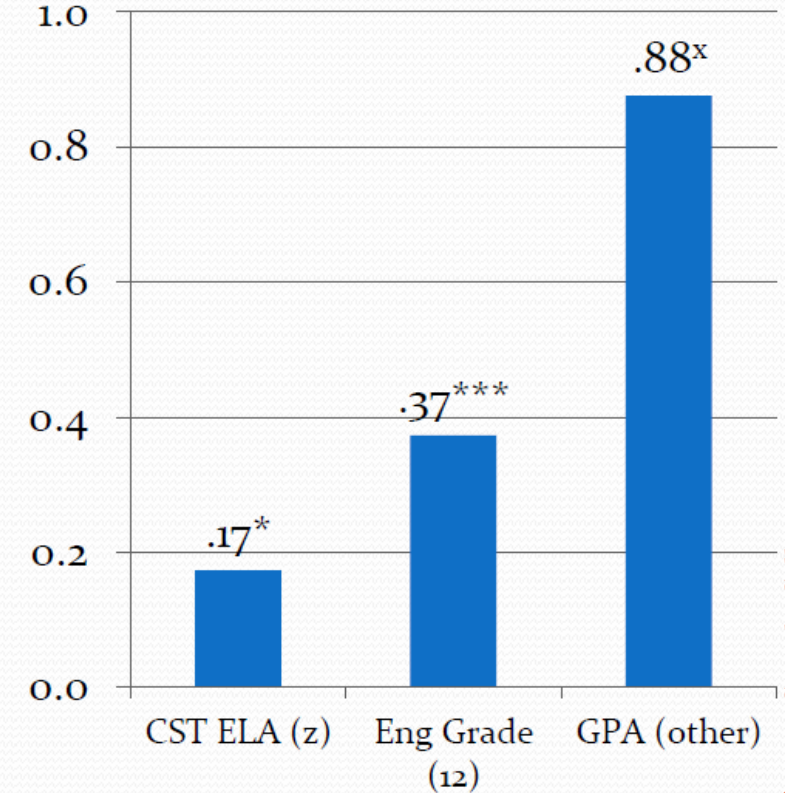

- English

Alignment in English

Predicting Placement

Predicting Performance

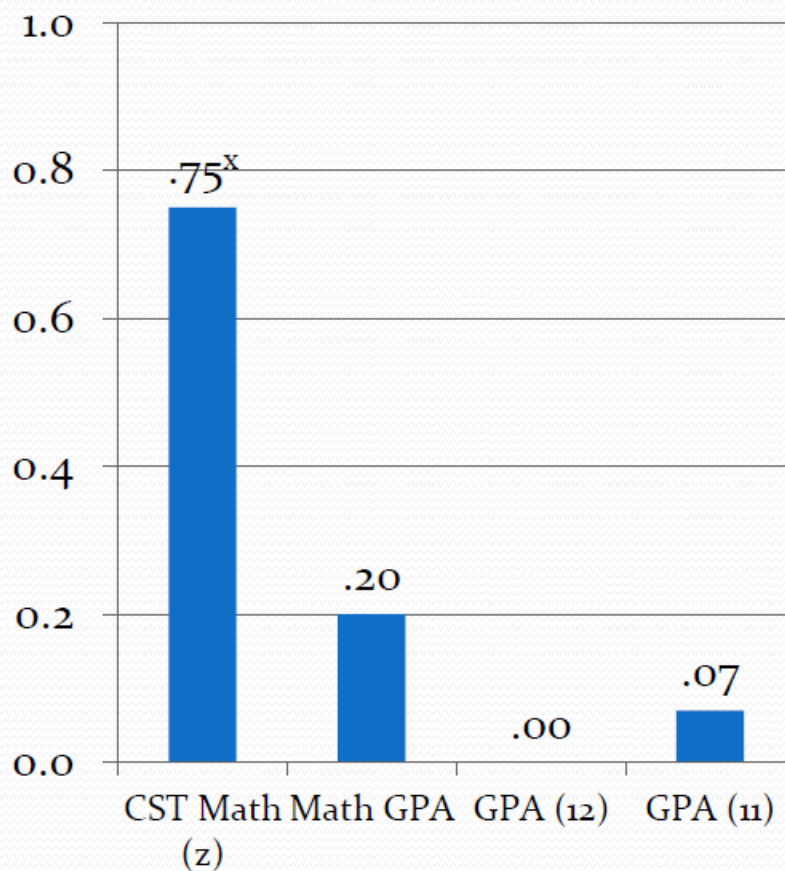

* $p < .05$ ** $p < .01$, *** $p < .001$, x = $p < 1 \times 10^{-10}$

Placement vs. Performance

- Math

Alignment in Math

Predicting Placement

Predicting Performance

* $p < .05$ ** $p < .01$ *** $p < .001$ x = $p < 1 \times 10^{-10}$

Place Students into College Course

Using Standardized assessment

Vs.

Multiple Measures

The Difference at LBCC: Placing Students by Standardized Assessment vs. Multiple Measures Models

| | | | |
|-----------------------|-----|-----|-----|
| ■ Previous Assessment | 11% | 48% | 41% |
| ■ Multiple Measures | 43% | 46% | 11% |

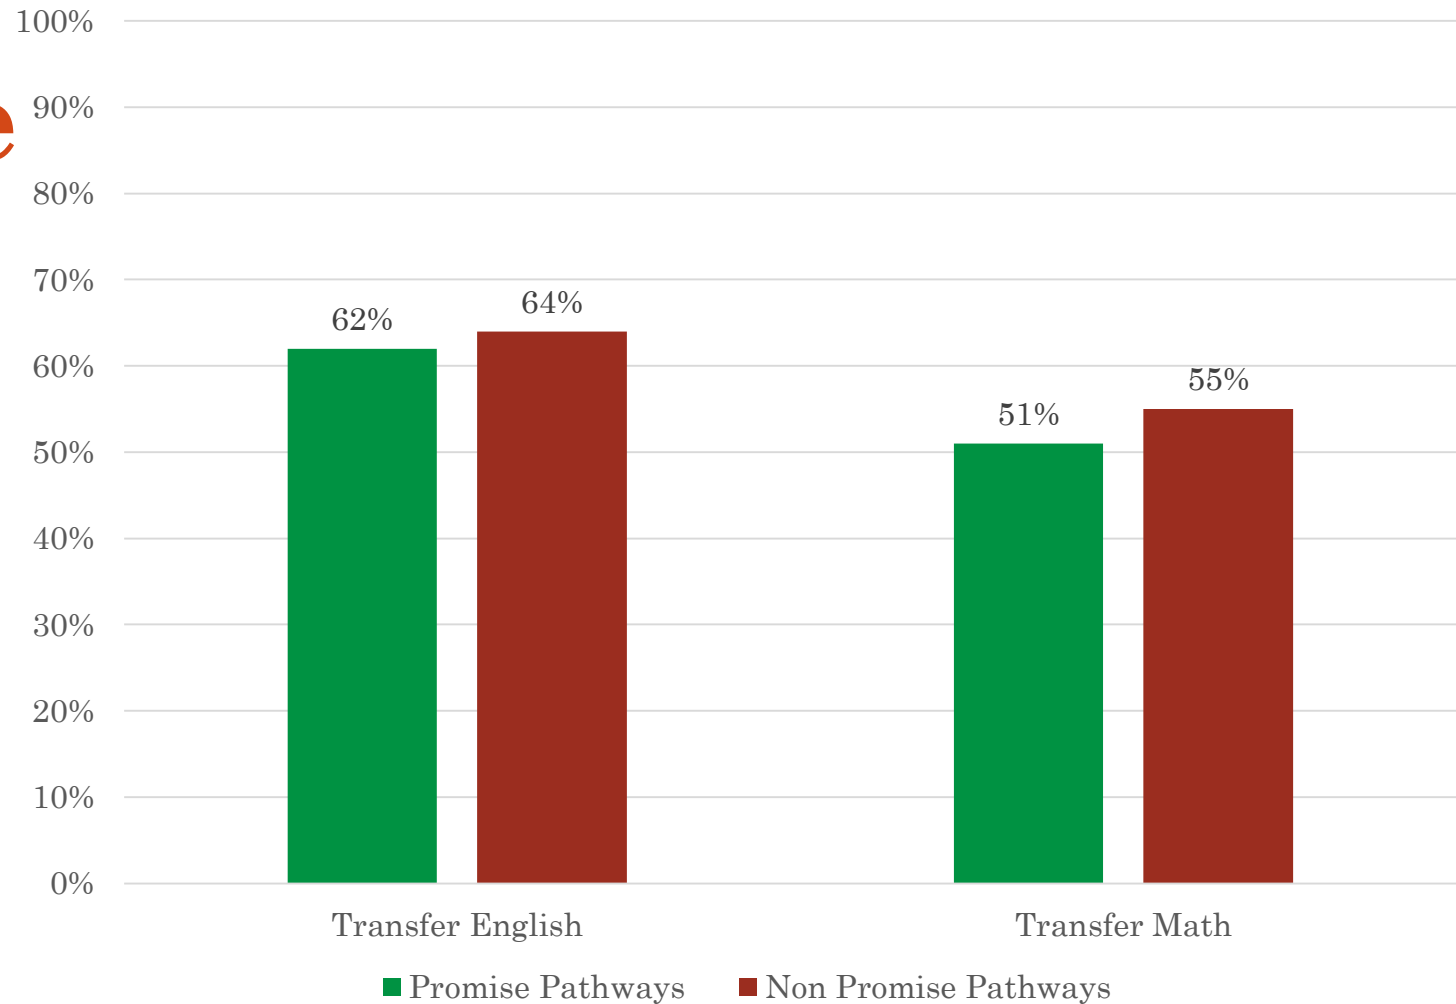

College Course Success Rate

Using Standardized assessment (Non Pathways)

Vs.

Multiple Measures (Promise Pathways)

Success Rate in College Level Courses in English and Math

Timeline for Pilot Study

August 2014

Sequoia Union High School District provides data via CalPASS.

September 2014

Cañada College analyzes the data and creates matrix (criteria).

October/November 2014

Cañada College registration begins.

Place recent high school graduates into college courses using their high school transcript.

While Canada uses transcripts to place students in 2015-16, students still need to take the placement test that Canada traditionally gives.

January 2015

Cañada analyzes the difference between students being placed using standardized tests and high school transcripts.

June 2015

Cañada analyzes the difference on student course success rate between these two groups and shares findings with SUHSD.
